

## Welcome to Windows® 10 IoT Enterprise 2021 LTSC and SAC editions!

You must enter a valid product key to install and test Windows 10 IoT Enterprise 2021 LTSC and Windows 10 IoT Enterprise SAC products. Use the following default product keys during installation based on whether you are implementing OEM Activation 3.0 as part of your device manufacturing process.

**Important:** The following product keys can be used during installation of the master software; however, they won't be recognized as valid for software activation purposes. Separate keys are needed to activate instances of the software

Windows® 10 IoT Enterprise 2021 LTSC Default Product Key to be used with OEM Activation 3.0 (OA3.0)

Version	Default Product Key
2021 LTSC	HTN4V-QRMBR-JM63Q-HP7Q2-KW6BT

Windows® 10 IoT Enterprise 2021 LTSC Default Product Key to be used without OEM Activation 3.0 (for PKEA and ePKEA).

Version	Default Product Key
2021 LTSC	QPM6N-7J2WJ-P88HH-P3YRH-YY74H

Windows® 10 IoT Enterprise SAC Default Product Key to be used with OEM Activation 3.0

Version	Default Product Key
Windows® 10 IoT Enterprise SAC	XQQYW-NFFMW-XJPBH-K8732-CKFFD

Windows® 10 IoT Enterprise SAC Default Product Key to be used without OEM Activation 3.0

Version	Default Product Key
Windows® 10 IoT Enterprise SAC	CHCDD-NBFKY-M8DJM-MHYBQ-T6RFF

The Assessment and Deployment Kit (ADK) is now available for OPK download on SOC. For more information on the Windows 10 Deployment Tools, please see the [Windows 10 Deployment Tools](#) topic on Microsoft TechNet. For more information about OEM Activation 3.0, see the OEM Activation 3.0 Resources which are available for download from the [Device Partner Center](#) website.
